

Note: Please be advised that the conference proceedings impose a strict page limit of six pages, whereas submissions to the journal may extend to a maximum of twenty pages. Authors who elect not to publish a short paper in the conference proceedings retain the option of submitting an abstract for inclusion.

TITLE OF RESEARCH PAPER

First Author, University/College Name, Country (E-mail ID)

Second Author, University/College Name, Country (E-mail ID)

Please do not add Prof./Dr./Mr./Mrs. or any designation such as Professor, Lecturer, etc.

ABSTRACT

Begin your manuscript with an abstract of about 200 words. It should describe the key points of your research, including objectives, methodology, and major findings. After reading your abstract, the reader should have a clear idea about your research. Common and scientific names are allowed, but references to the literature and mathematical symbols or equations should not be included in the abstract.

Keywords: Number of keywords limited between 5 and 7.

1. INTRODUCTION(Level 1: First Section)

The introduction leads the reader to identify the importance of research and the aim of the research and literature review (Sharma, 2025). The introduction summarizes the research, including background information about the topic, the methodology used, and the research data applied for experimental work. Throughout the paper, running text should be single-spaced, and paragraphs should be double-spaced.

2. LITERATURE REVIEW

In the literature review, different sources related to the topic should be presented. The literature should be related to either the domain or the method, technique, or algorithm used in the correspondence research. The previous research (Loi et al., 2019) should be described in the form of a title, a problem statement, and objectives. All the cited literature in the text must be cited in the references.

3. RESEARCH METHODOLOGY

3.1 Data Set (Level 2: Subsection)

Only the first and second-level headings will be numbered. Out of that, all the next two lower-level headings should be formatted as run-in headings.

Sampling Heading (Level 3)

This will be used as the inner subsection of level 2.

Sample Heading (Level 4)

The headings in the research paper should not be more than four. The following table has all the heading details.

Table 1: Table caption should be placed within table and centred			
Heading Level	Writing Examples	Alignment	Font Size and Style
Paper Title	TITLE	Centre	14 point, Bold, Times New Roman
Level 1	1. INTRODUCTION	Left	12 point, Bold, Times New Roman
Level 2	1.2 Subsection	Left	10 point, Bold, Times New Roman
Level 3	Run –In Headings	Left	10 point, Bold, Times New Roman
Level 4	Running Text	Left	10 point, Times New Roman

The cell alignment property of the table is based upon research matter.

Equations are centered and written using the equation box. The equation number is right-aligned and enclosed in parenthesis.

$$A = \pi r^2 \quad (1)$$

Please try to avoid rasterized images for line-art diagrams and schematics. Instead of this, use a vector graphic image similar to the following:

Figure 1: The figure caption is always placed below the figure and centered. A long caption should be justified.

For the citation of references, you will use the following APA format:

- Sharma (2025): This will be used when the author is single and starts with the author's last name.
- Roy et al. (2019): This will be used for multiple authors.
- (Roy, 2019): This will be used in the running text.

All the literature listed in the references should be cited at least once. Every reference should be cited, and every citation should be in the reference list.

4. CONCLUSION

The main outcome of the research is described in this section. The author must mention the conclusion of the research in brief. The limitations and future work of the research can also be mentioned here.
